

AL-FP96-GPS Specification

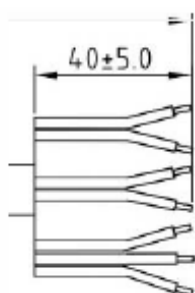

*GPS Multi-Function Alarm With Flasher
Automatic Night Silent, Automatic Speed Cut Off (Left, Right and Reverse)*

Features

- The FP96 alarm is active if the vehicle speed is below 20mp/h. Over 20mp/h the alarm is deactivated automatically.
- By utilising GPS the alarm only works from 7:00am to 11:00pm GMT. It is deactivated at all other times automatically.
- Mute switch can be activated during operational hours to mute the system for 15 minutes.
- 2A output wire gives 12v output below 20mp/h.

Wiring

Red – ACC
 Black – GND
 Pink – Left Indicator Trigger
 Orange – Right Indicator Trigger
 Green – Reverse Trigger
 Purple – 12V 2A Output (Under 20mp/h)
